Professional Summary

B.Tech student in Computer Science and Business Systems with hands-on experience developing full-stack web applications using the MERN stack. Familiar with Java, JavaScript, and SQL, with a strong foundation in data structures, object-oriented programming, and database management. Developed web applications with authentication, REST APIs, admin dashboards, database integration, and cloud deployment. Experienced in working on real-world projects and solving practical software development problems. Seeking a Software Engineer opportunity to apply my technical skills and continue growing as a software developer.

Technical Skills

- **Languages:** Java, JavaScript, SQL
- **Frontend:** HTML5, CSS3, React.js, Tailwind CSS
- **Backend:** Node.js, Express.js
- **Database:** MongoDB
- **Tools & Technologies:** Git, GitHub, REST APIs, JWT, Vercel, Render, Cloudinary

Projects

1. Ashmir Mocktails – Business Web Application <https://ashmirmocktail.vercel.app/> 08/2026

Tech Stack: MongoDB, Express.js, React.js, Node.js (MERN), Tailwind CSS, JWT, Cloudinary

- Built a full-stack MERN web application for a mocktail and event-services business, providing a centralized online platform to showcase its menu, services, gallery, and event work.
- Developed a secure admin dashboard with JWT authentication, bcrypt password hashing, and protected routes for CRUD-based management of menus, categories, services, gallery, and event showcases.
- Implemented dynamic content and image management using MongoDB, Multer, and Cloudinary, allowing administrators to update website content without modifying frontend code.
- Implemented a validated event enquiry workflow that generates structured, pre-filled WhatsApp messages with customer and event details for direct communication with the business.

2. Al-Ansar Stores – E-Commerce Platform <https://al-ansar-dry-fruits-frontend.vercel.app/> 12/2025 – 02/2026

Tech Stack: MongoDB, Express.js, React.js, Node.js (MERN), Tailwind CSS, Cloudinary, Vercel

- Developed a full-stack e-commerce web application using the MERN stack with a responsive interface for browsing and purchasing dry fruit products.
- Implemented Email OTP authentication, JWT-based authorization, product search, cart, checkout, and order tracking for the customer shopping workflow.
- Integrated an AI-powered chatbot (Ansari) to assist customers with product recommendations and information about dry fruit health benefits.
- Built an admin dashboard for managing products, inventory, users, and orders, with product image storage using Cloudinary.
- Deployed the application on Vercel with a responsive interface supporting desktop and mobile devices.

Education

Heritage Institute of Technology

B.Tech – Computer Science and Business Systems

2023 – 2027

CGPA: 7.98 / 10 (up to 6th Semester)

Shree Jain Vidyalaya

W.B.C.H.S.E (Class XII)

2022 – 2023

82.4%

Tantia High School

W.B.B.S.E (Class X)

2020 – 2021

87.62%

Achievements & Activities

- Solved 150+ Data Structures and Algorithms (DSA) problems across LeetCode and GeeksforGeeks.
- Achieved the HackerRank SQL Gold Badge, demonstrating proficiency in SQL queries, joins, aggregations, and database concepts.
